

Internship Report
Of
Web Development Internship: Event Management & URL Shortener

Submitted
To
School of Computer Science and Engineering IILM
University, Greater Noida, U.P.

In partial fulfilment of the requirement of degree of
B.Tech CSE

By
Roll Number of Student: 25scs1003004469
Name of Student: TUSHAR JHA
Batch: 2025-29

CANDIDATE'S DECLARATION

I, Tushar Jha do hereby declare that the internship report titled “Web Development Internship: Event Management & URL Shortener” has been completed by me to fulfil the requirement for the award of the degree of Bachelor of Technology in CSE. All the references have been quoted and I have not taken as such any material from any other source. I affirm to you that this report is my own and has not been submitted to any other institute for any degree/diploma requirement and further I shall be solely responsible for any kind of copyright violation in this regard.

ACKNOWLEDGEMENT

I am using this opportunity to express my gratitude to everyone who supported me throughout the Internship Program. I am thankful for their aspiring guidance, invaluable constructive criticism and friendly advice during this work. I am sincerely grateful to them for sharing their truthful and illuminating views on a number of issues related to this work.

I express my gratitude to my parents for their blessings.

4. Project Description

4.1 Introduction

During the course of the internship, two major projects were successfully developed and deployed to address specific requirements in digital infrastructure: an Event Management System and a URL Shortener application. The Event Management System is designed to streamline the coordination, registration, and tracking of events, while the URL Shortener serves as a practical utility to convert complex, lengthy web addresses into concise, easily manageable strings.

4.2 Organization Profile

CODE ALPHA - CodeAlpha is a virtual, task-based technology internship program where students complete self-paced coding assignments to earn completion certificates.

4.3 Problem Statement

Organizations face persistent challenges in coordinating multiple variables associated with event hosting. These challenges result in fragmented communication and data silos. Furthermore, the modern web requires efficient link sharing; long URLs are cumbersome, prone to truncation in communication channels, and difficult to track for analytics. There is a need for robust, accessible tools to solve both issues efficiently.

4.4 Project Objectives

- To design, develop, and integrate a comprehensive Event Management web application tailored for ease of user navigation.
- To build a reliable URL Shortener that generates unique aliases and efficiently maps them back to original lengthy URLs.
- To construct scalable RESTful APIs that serve both systems and manage database operations efficiently.

4.5 Scope of the Project

The scope encompasses the full software development life cycle for both applications. For the Event Management module, the scope covers user management, event creation, and basic ticketing parameters. For the URL Shortener module, the scope includes link creation, immediate redirection handling, and laying the groundwork for click-tracking mechanisms.

4.6 Technologies and Tools Used

- **Programming & Scripting:** JavaScript, Python, HTML/CSS
- **Frameworks:** Node.js, React.js (or equivalent)
- **Database Management:** MongoDB / PostgreSQL • **Version Control:** Git

4.7 System Architecture

The deployed applications employ a Client-Server architecture. The user interface communicates with the backend server via HTTP protocols and RESTful endpoints. The backend logic securely interacts with the database layer to persist state, such as saving event details or securely mapping a short token to its corresponding lengthy URL destination.

4.8 Methodology

The project was executed using an Agile framework. Work was divided into iterative sprints starting from initial requirements gathering and schema design, progressing to API endpoint development, frontend integration, and culminating in thorough testing and debugging phases.

4.9 Expected Outcomes

The definitive outcomes are fully functional and hosted codebases available for review. Users of the systems can seamlessly create events and manage web links, reflecting standard industry practices in web application development and continuous deployment.

4.10 Certificates of completion and other communication mail proof

CERTIFICATE OF COMPLETION

This Certificate Is Proudly Presented To

Tushar Jha

This Certificate recognizes the successful completion of the CodeAlpha Virtual Internship Program in Backend Development, demonstrating dedication and sincerity throughout the program.

We appreciate the valuable efforts and wish continued success in all future endeavors.

1st August 2026 to 30th August 2026

INTERNSHIP OFFER LETTER

Date: 29th July 2026

Student ID: CA/DF1/229260

Name: Tushar Jha
Welcome to CodeAlpha

Congratulations! We are delighted to make you an offer as **Backend Development internship** offer letter is to confirm your selection **Backend Development internship** at **CodeAlpha** and welcome you for the same effective from 1st August 2026 to 30th August 2026. Hope you will be doing well.

This Internship is observed by CodeAlpha as being a learning opportunity for you.

Your internship will embrace orientation and give emphasis on learning new skills with a deeper understanding of concepts through hands-on application of the knowledge you gained as an intern. You will acknowledge your obligation to perform all work allocated to you to the best of your ability within lawful and reasonable direction given to you.

We look forward to a worthwhile and fruitful association which will make you equipped for future projects.

Wishing you the most enjoyable and truly meaningful internship program experience.

Sincerely,

Swati Srivastava
Founder & CEO

CodeAlpha Internship

Your Internship Tasks Have Been Assigned

Hello Tushar Jha,

Congratulations! Your internship registration has been successfully verified, and your internship tasks are now available.

You have been assigned 4 project tasks for your selected internship domain. Out of these, only 2 or 3 tasks (as mentioned in your task document) are mandatory to complete.

Student Information

Student Name

Tushar Jha

Student ID

CA/DF1/229260

Internship Domain

Backend Development
